

RAMP/MEC Checks

1. **Head bending backwards uses two different thresholds:** This was already fixed and now we are using (-5) everywhere.

2. **One score is built differently from the other five:**

Yes, it is, it was changed on 28-11-2025 by Assia, commit message “ update ramp calculations based on documentation” this was requested by farhad. 3.

The same score gets two different colours:

Yes for posture 8 , done my moussa on 10-07-2024, Every other posture falls through to the general branch (≥ 1.5 && $\leq 2 \rightarrow$ yellow); only postures_8 uses ≥ 1 && ≤ 2 , which is why a score of 1 goes yellow there and nowhere else.

4. **Hand distance ignores which task was selected :**

No because get_filtered_measurements function already take task in consideration

5. **RAMP ignores the arm lengths:** Added (user enter value)

6. **Trunk and head percentiles never reach the Word report :** Already fixed last week

7. **A perfect result looks the same as a missing sensor :** Done

8. Question 1.5 shows the wrong question text : Done

9. Every RAMP item's sub-rows restart at 1.1 : Done

10. **MEC question 11 — three names, one calculation :** Yes ; We use for neck bending (head-trunk) **should we change the title ?**

11. **MEC questions 12.1 and 12.2 look dead: YES I removed it**

12. **The AI section can vanish from the report without a word :** Yes when an error raised , the section will be ignored, how should we handle it ?

RAMP Ranges and illustration changes :

- **1.2 , head backward** is calculated with -5 but illustration and justification are using -10 , if we keep using -5 , We need new illustration
- 1.3 , forward calculation (20 - 45) but illustration show 20-44 , should we change range or illustration ?
- 1.3 Side bending calculation (10-29) , this is where you told me to change to 30, if it is confirmed we need to change illustration.
- 1.4 (the third sub question backward bending more than 5 degrees) illustration is not correct at all.

- 1.5 illustration should be changed too, to show Degree in it similar to others.
